Emerson Introduces DeltaV Connect™ Solution Update for Migration of Legacy Honeywell® Systems to PlantWeb® Digital Architecture

*DeltaV Connect solution is now available for Honeywell Systems
and opens the door to proven PlantWeb capabilities and benefits*

Emerson Process Management announces availability of the updated DeltaV Connect solution for Honeywell Systems, an advanced migration solution to transition Honeywell systems to Emerson's PlantWeb digital plant architecture. Emerson's migration consultants deliver the services, expertise and training to enable process manufacturers to seamlessly and safely transition existing operations over to the benefits of PlantWeb digital, predictive technologies with zero down time.

The DeltaV Connect migration solution improves operational effectiveness and addresses process manufacturers' concerns with the limits of older technologies including slow response times, loss of view to the process, difficulty in finding parts, and increasingly expensive support.

"Our migration solutions, technology and expertise come together to offer many plants a compelling, low risk transition path for Honeywell legacy systems, as well as those from other automation suppliers," said Tom Snead, president of the Systems and Solutions division of Emerson Process Management. "We help process manufacturers take advantage of existing automation investments while building a base for the latest digital technologies."

Emerson builds migration solutions with open communications technologies which connect with existing systems while adding the latest operator interface, event and alarm management capabilities. The DeltaV Connect solution provides operators access to both Honeywell TPS/TDC 3000® system and DeltaV equipment from a common integrated DeltaV Operator Station.

Process manufacturers can immediately replace their legacy Honeywell consoles, and have an easy transition path from their TDC 3000/TDC 2000 controllers and I/O to DeltaV equipment, in a phased approach which fits their timing. DeltaV Connect for Honeywell Systems v1.2 is compatible with DeltaV v7.4.1, DeltaV v8.3 and higher.

Notes for the Editor:

About Emerson Process Management

Emerson Process Management (www.EmersonProcess.com), an Emerson business, is a leader in helping businesses automate their production, processing and distribution in the chemical, oil and gas, refining, pulp and paper, power, water and wastewater treatment, food and beverage, life sciences and other industries. Emerson's Process Systems and Solutions division technology and expertise play a key role in Emerson's combining of superior products and technology with industry-specific engineering, consulting, project management and maintenance services. Emerson brands include DeltaV Connect™ for Honeywell® Systems, PlantWeb®, Micro Motion®, Fisher®, Rosemount®, Mobrey®, Daniel®, DeltaV™, Ovation®, and AMS™ Suite.

About Emerson

Emerson, based in St. Louis, is a global leader in bringing technology and engineering together to provide innovative solutions to customers through its network power, process management, industrial automation, climate technologies, and appliance and tools businesses. Sales in fiscal 2006 were \$20.1 billion. For more information, visit www.Emerson.com

PlantWeb, Micro Motion, Fisher, Rosemount, Mobrey, Daniel, DeltaV, Ovation, and AMS are marks owned by one of the Emerson Process Management group of companies. DeltaV Connect solution for Honeywell Systems is not a product approved or endorsed by Honeywell International Inc. TDC 3000 is a mark of Honeywell International Inc. who also claims to own the following marks: Honeywell TotalPlant, Universal Control Network, Local Control Network, LCN and Process Manager. All other marks are the property of their respective owners.
